Introduction

This study guide is designed to help you obtain your maximum potential score on the National Police Officer Selection Test (POST). It is divided into four parts, which provides useful information on preparing to take the test.

Preparing for the Test

Taking the Test

Sample Test Answer Key

Preparing for the Test

You will increase your chances of obtaining your best possible score if you spend a fair amount of time preparing for the test. This includes finding out as much as possible about the test ahead of time, paying proper attention to your physical well-being before the test, taking care to avoid becoming overly anxious about the test and using a good test-taking strategy. Preparation in these areas can help you achieve your best possible score on the test.

For optimal test results, read this study guide thoroughly and answer the sample test items beginning on page 7. Make sure you read all the directions carefully and each test question completely before answering.

Test Format

The POST is made up of four separately-timed test sections. The first three sections (Mathematics, Reading Comprehension and Grammar) utilize multiple-choice and true/false formats. The fourth section, Incident Report Writing, requires you to write out your answers in complete sentences in the spaces provided in the test booklet.

Though most of the questions in this test battery relate to police duty, no prior knowledge of law or law enforcement will be needed to answer the questions.

Examination Hints

Attempt to answer every question on the test. There is no penalty for guessing because your score is based on the total number of correct answers. This means you should respond to every question, even when you are not certain of the correct answer. When you are uncertain, your answer should be your best guess, and you should then move on to the next question. You will need to balance the amount of time you spend on each question with the total amount of time allotted to take the test. You will be told when to start and stop each section. If you have extra time, you are allowed to check your work in that section of the test only.

Time Limits

It is important to know the amount of time allowed for each section so you can pace yourself and not spend too much time on questions causing you problems. Remember there is no penalty for guessing. If you find you are spending too much time on a question, you should make your best guess and move on. If you finish before time is called, you can go back and check your answers in the section you are working on. The number of test items and time limits for each of the sections of the test are listed below.

Section	Test	Number of Items	Test Time
I	Mathematics	20	20 minutes
II	Reading Comprehension	25	25 minutes
III	Grammar	20	15 minutes
IV	Incident Report Writing	10	15 minutes

Marking Your Answers

The test will be computer scored. Therefore, it is important to follow the instructions below to insure your answers are read correctly.

- Use a #2 or softer lead pencil. Do not use ink.
- Make heavy black marks that completely fill the oval.
- Erase completely any marks you wish to change
- Make no stray marks on the test booklet. Scratch paper will be provided in the math section to do your figuring.
- Be sure that you blacken only one oval for each question. If you blacken more than one oval it will be counted as incorrect, even if one of the answers is correct.
- The first three sections of the test are in a multiple-choice format. The ovals appear next to the test questions as shown in the example below:

1. 

Notice that for each number there are five ovals labeled A, B, C, D and E. You will blacken the oval that corresponds to the answer you think is correct. For example, assume that for test question number 1, you feel that B is the correct answer. You would blacken the oval labeled B on your answer sheet as shown in the example below.

The fourth section of the test requires the test taker to answer questions in complete sentences. The sentences must contain the correct information, be grammatically correct and all words should be spelled correctly. Pages 7-19 of this study guide give various sample test items and answers.

Taking the Test

This part of the POST study guide provides some common sense advice for the day you take the test. Although these points may seem obvious, it is attention to details such as these that will increase your probability of obtaining your maximum potential score.

Before The Test Begins

Arrive early. You may be assigned a seat or you may be able to pick your own. Either way, settle in and put your things away. Try to relax, but concentrate on the test you are about to take. Put outside distractions out of your mind. Give the test you are about to take your complete attention.

Listen Carefully

The test administrator will provide you with complete and detailed instructions for taking each section. Be sure that you pay close attention to what this person has to say. Do not read ahead because you may miss something very important. If you do not hear or do not understand the directions, ask the test administrator to repeat them. It is extremely important that you completely understand the directions **before** the test begins.

Test Timing

Just before the signal to begin each section is given, make a mental note of what time it will be when the time limit for the section is up. For example, if the time limit is 15 minutes and it is currently 4:15, make a mental note that time will be up at 4:30. This will allow you to pace yourself while working through the test. Remember, your score on the test will be the total number correct. Therefore, you will want to work both quickly and accurately.

You should balance the amount of time you spend on each question. You should devote enough time to work through the question, but you should not spend too much time on any one question that is giving you difficulty. When this occurs, make your best guess and move on to the next question. If you finish before time is up, you can always go back and check the questions on which you guessed.

Preparing Yourself Physically for the Test

- Avoid junk food and concentrate on a well balanced diet for at least several days before the test.
- Avoid tranquilizers and stimulants, such as coffee, especially on the day of the test.
- Get a good night's sleep before the test.
- Do not drink a lot of liquids or eat a big meal before the test.
- Avoid alcohol several days prior to and especially on the day of the test.

Sample Test Items

Section I In this section of the exam you will be provided with situations that require the use of basic arithmetic. You will read each situation and solve the problem. You are not allowed to use a calculator in this section; scratch paper will be provided in the test booklet to do all of your figuring.

Delivery vehicles will be issued a “B” license plate which allows them access to the city center for loading and unloading between 8 and 10 am and 4 to 6 pm only. There is no restriction on deliveries over the weekend. Shop and business owners within the city center will be issued a “Q” license plate which allows them access to their place of business; however, parking within the city center must be off-street.

Privately-owned vehicles with an “X” license plate may be driven and parked within the city center on Monday, Wednesday and Thursday only. Vehicles issued a “Z” license plate may be driven and parked within the city center on Tuesday, Wednesday and Friday only.
